# Definition of OOP

**Collecting & storing** data only once

Streamlining processes by:

- Enabling automated data sharing
- Replacing redundant data collection with information requests from original source
- Improving data reliability

# TOOP Project Goals

- Time savings for PAs and businesses;
- Lowering administrative burdens and costs;
- Improved service quality and public sector efficiency;
- Compliance with data protection legislation;
- Security, interoperability, data quality, user-friendliness.
- Long-term goal: better functioning DSM.

# TOOP Pilot Scenarios

Cross-border e-services for business mobility

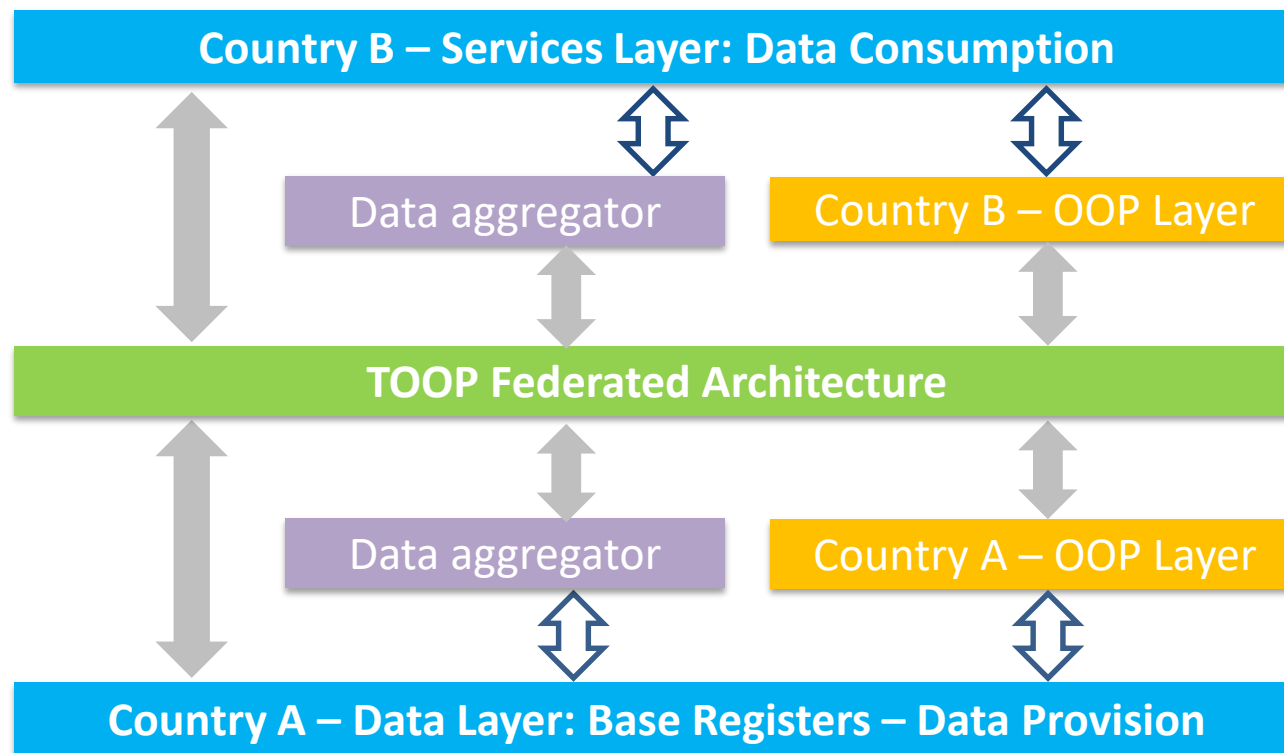

Updating connected company data

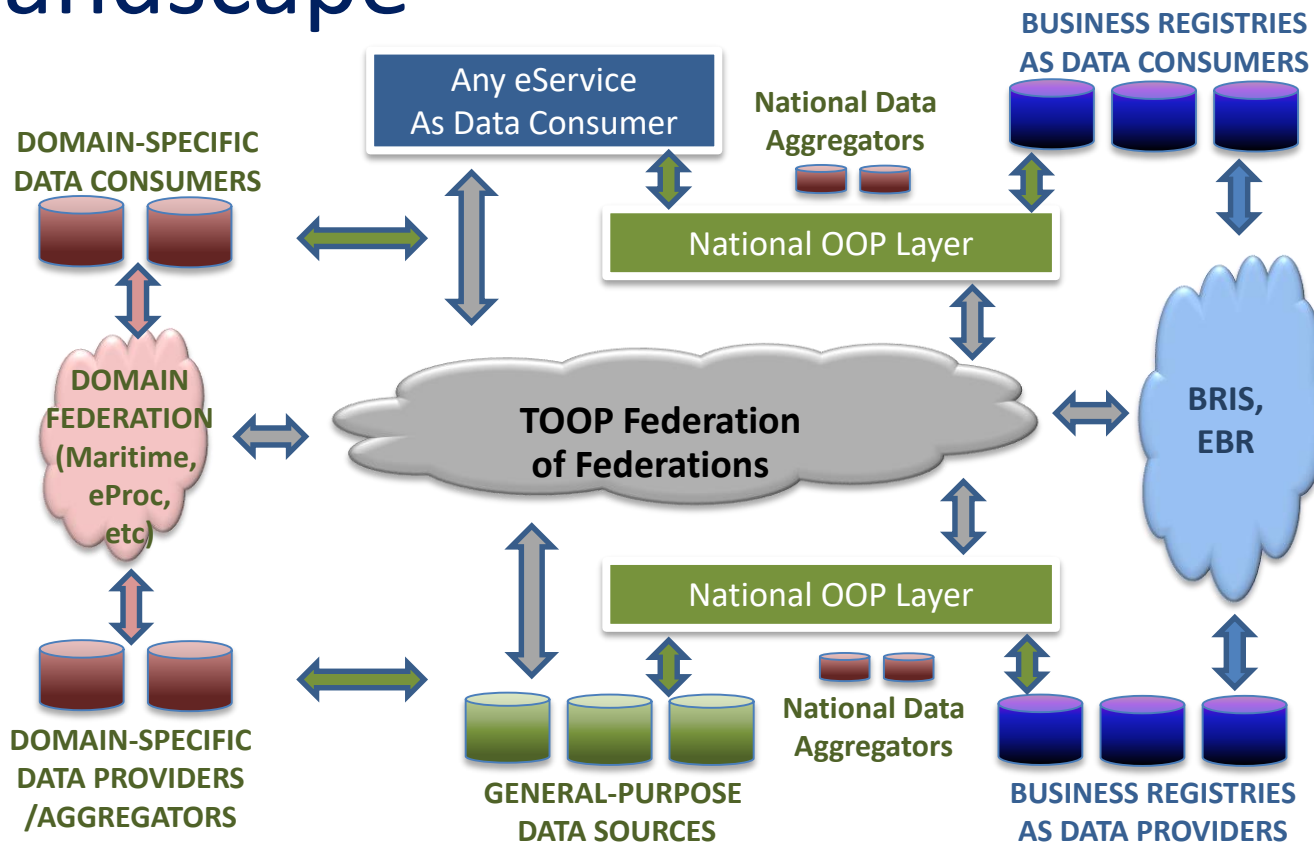

Online Ship and Crew Certificates

**2 baseline scenarios: data pull and data push**

# The Cross-Border OOP Case

# The pan-European OOP landscape

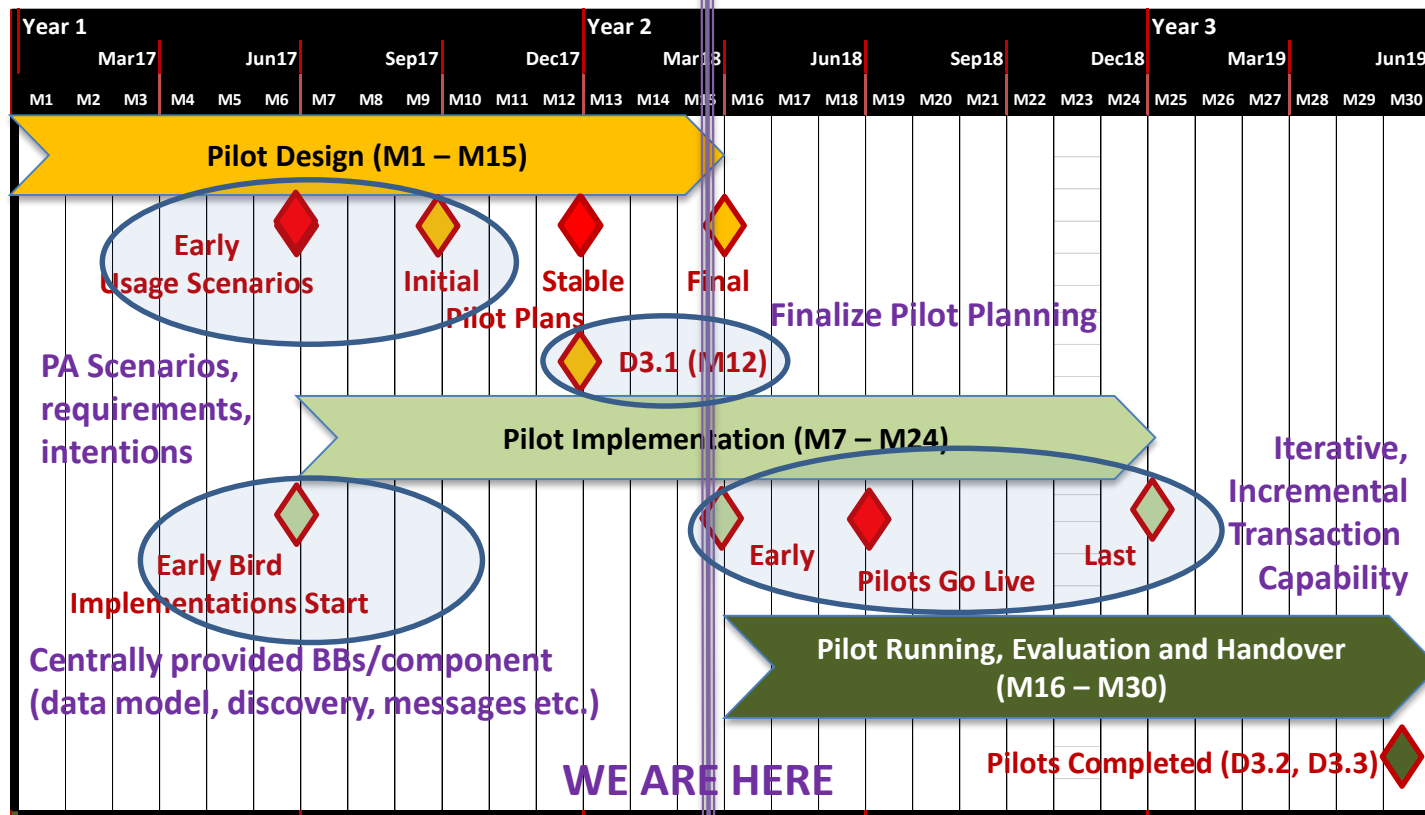

# Piloting update

- Working in an agile way;
- First version of TOOP common components released in May;
- Implementation of TOOP software components;
- TOOP pilots will be ready to test data exchange via TOOP infrastructure in autumn 2018;
- Sweden and Greece - the first active implementation:
  - Greek ESPD service deployed with data consumer capability;
  - Swedish Business Register deployed as data provider and data consumer.
- Working on extending the use cases in alignment with SDGR.

# Pilot Milestones and Timeline – Current Snapshot

SCOOP4C

# SAVE THE DATE!

## THE ONCE-ONLY PRINCIPLE FOR EUROPE CONFERENCE

Vienna, 24-25 September 2018!

### Learn about:
