

A network diagram with a light blue grid background. It features several blue circular nodes connected by red and blue lines. One central node is highlighted with a white glow. The text is overlaid on this diagram.

The Once-Only Principle for Europe Conference

Cross-border Implementation of OOP in Europe Piloting with TOOP

Lefteris Leontaridis – TOOP Piloting Manager

Vienna, 24 September 2018

1. E-PROCUREMENT AS AN ONCE-ONLY PROCESS

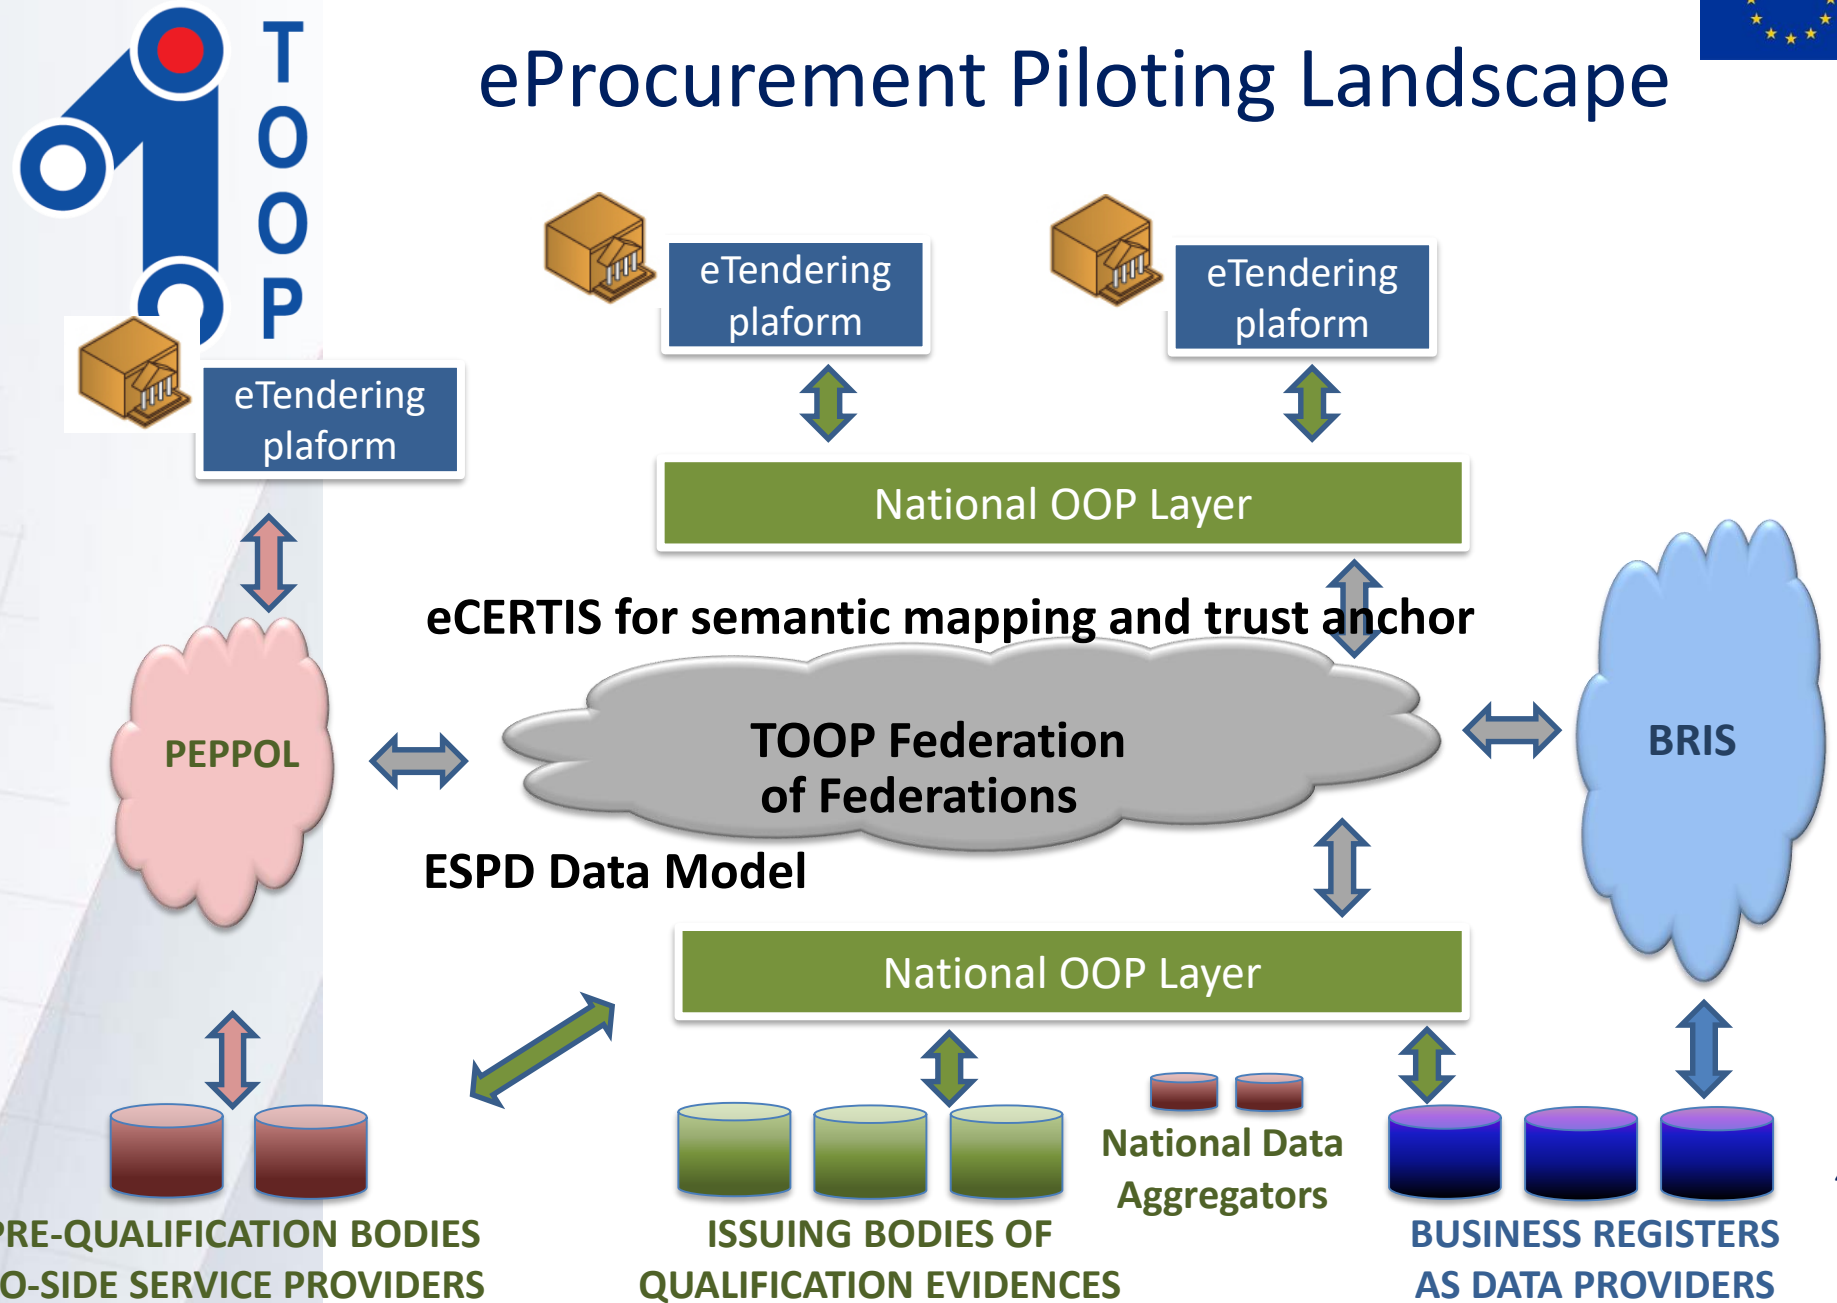

Domain history and legal basis

- Cross-border interoperability for 10 years
 - PEPPOL LSP (Virtual Company Dossier)
 - E-SENS LSP (system-to-system eTendering)
 - ❖ MS implementation now funded by CEF Telecom
- 2014 Directive for public procurement
 - European Single Procurement Document (ESPD)
 - ❖ ESPD Data Model, eCertis
 - Obligation of Contracting Authorities to retrieve automatically evidences available online
- 2018 Single Digital Gateway Regulation (upcoming)
 - eProcurement is included as OOP-enabled
 - Extends OOP obligation to company data

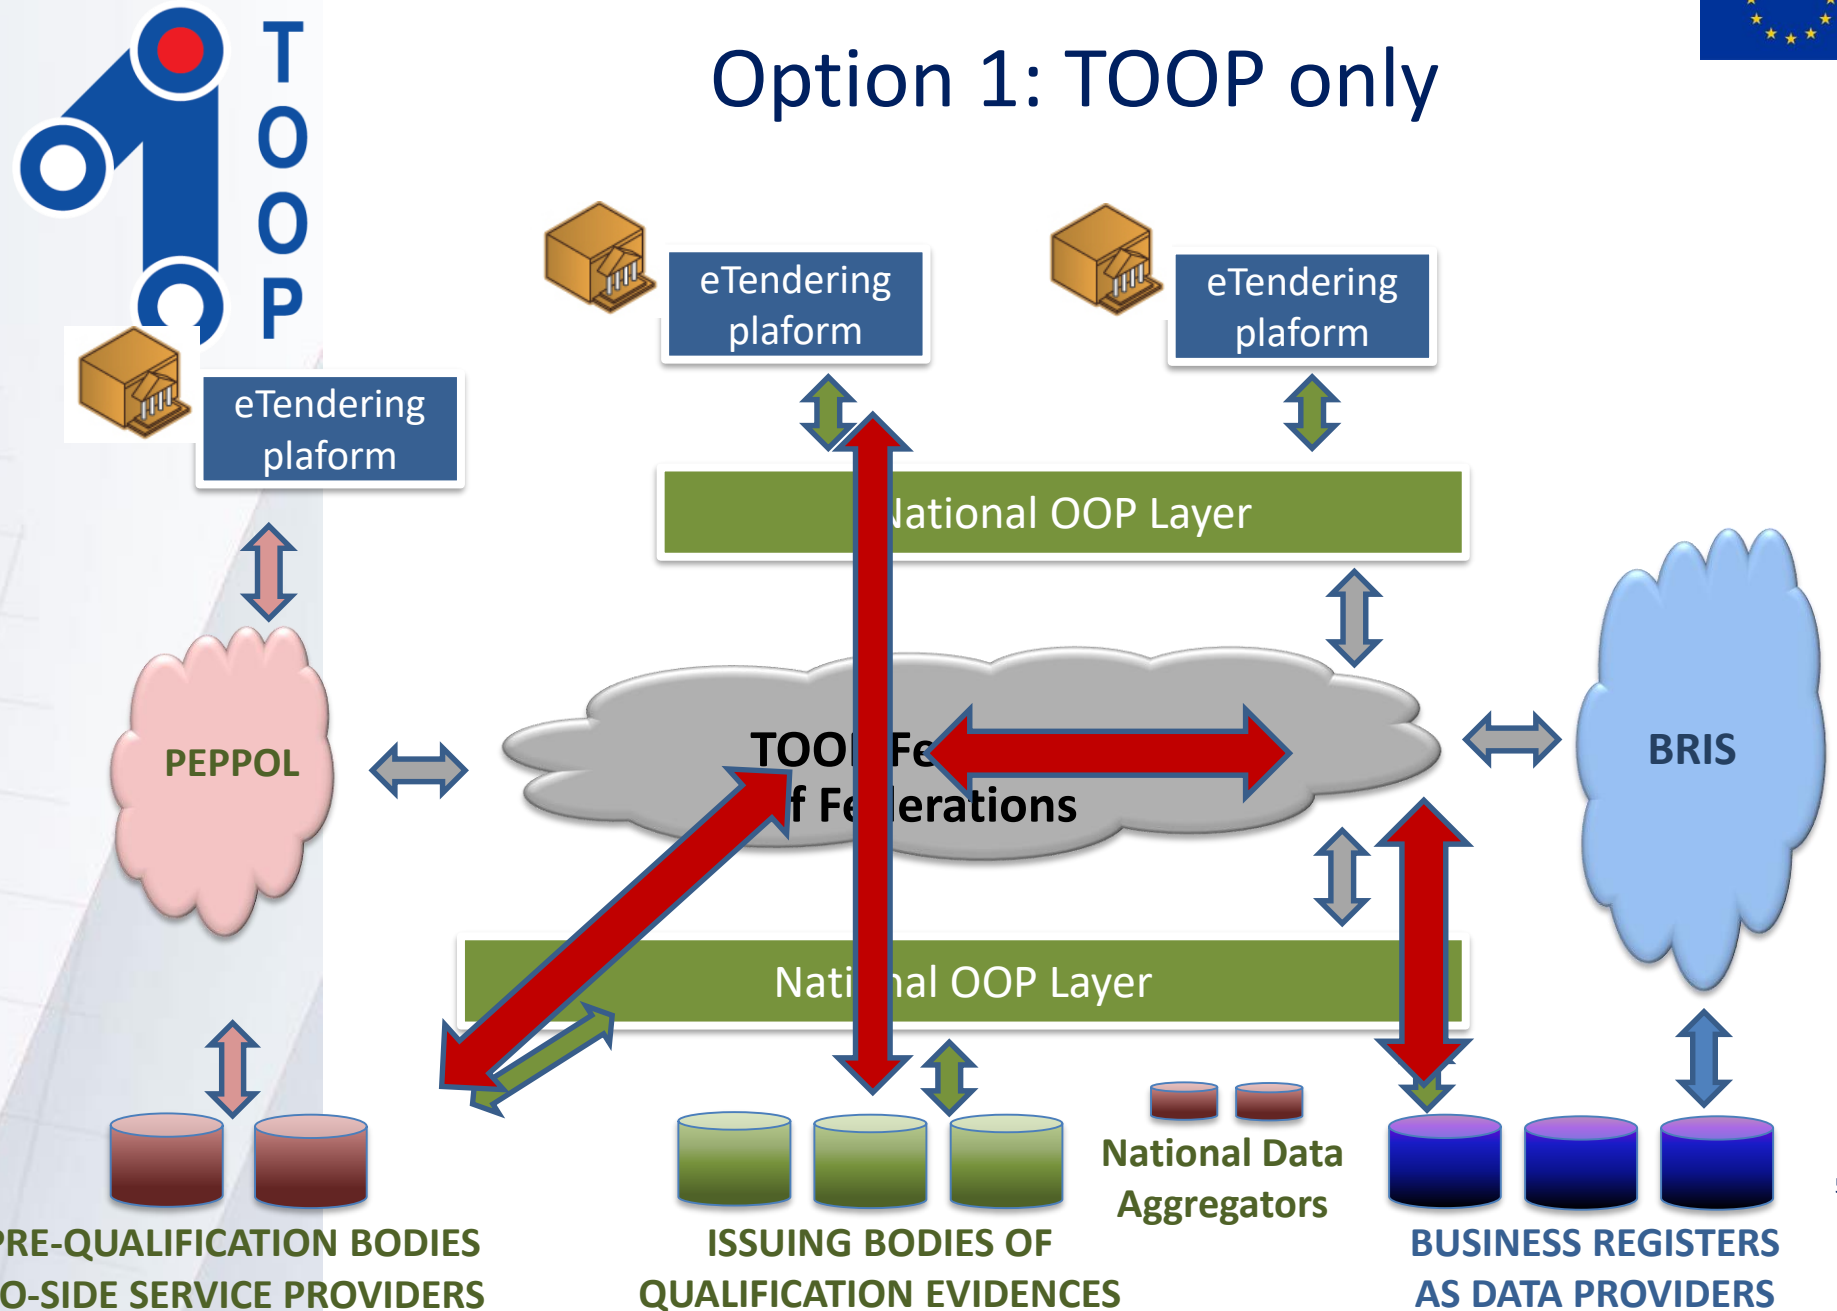

eProcurement Piloting Landscape

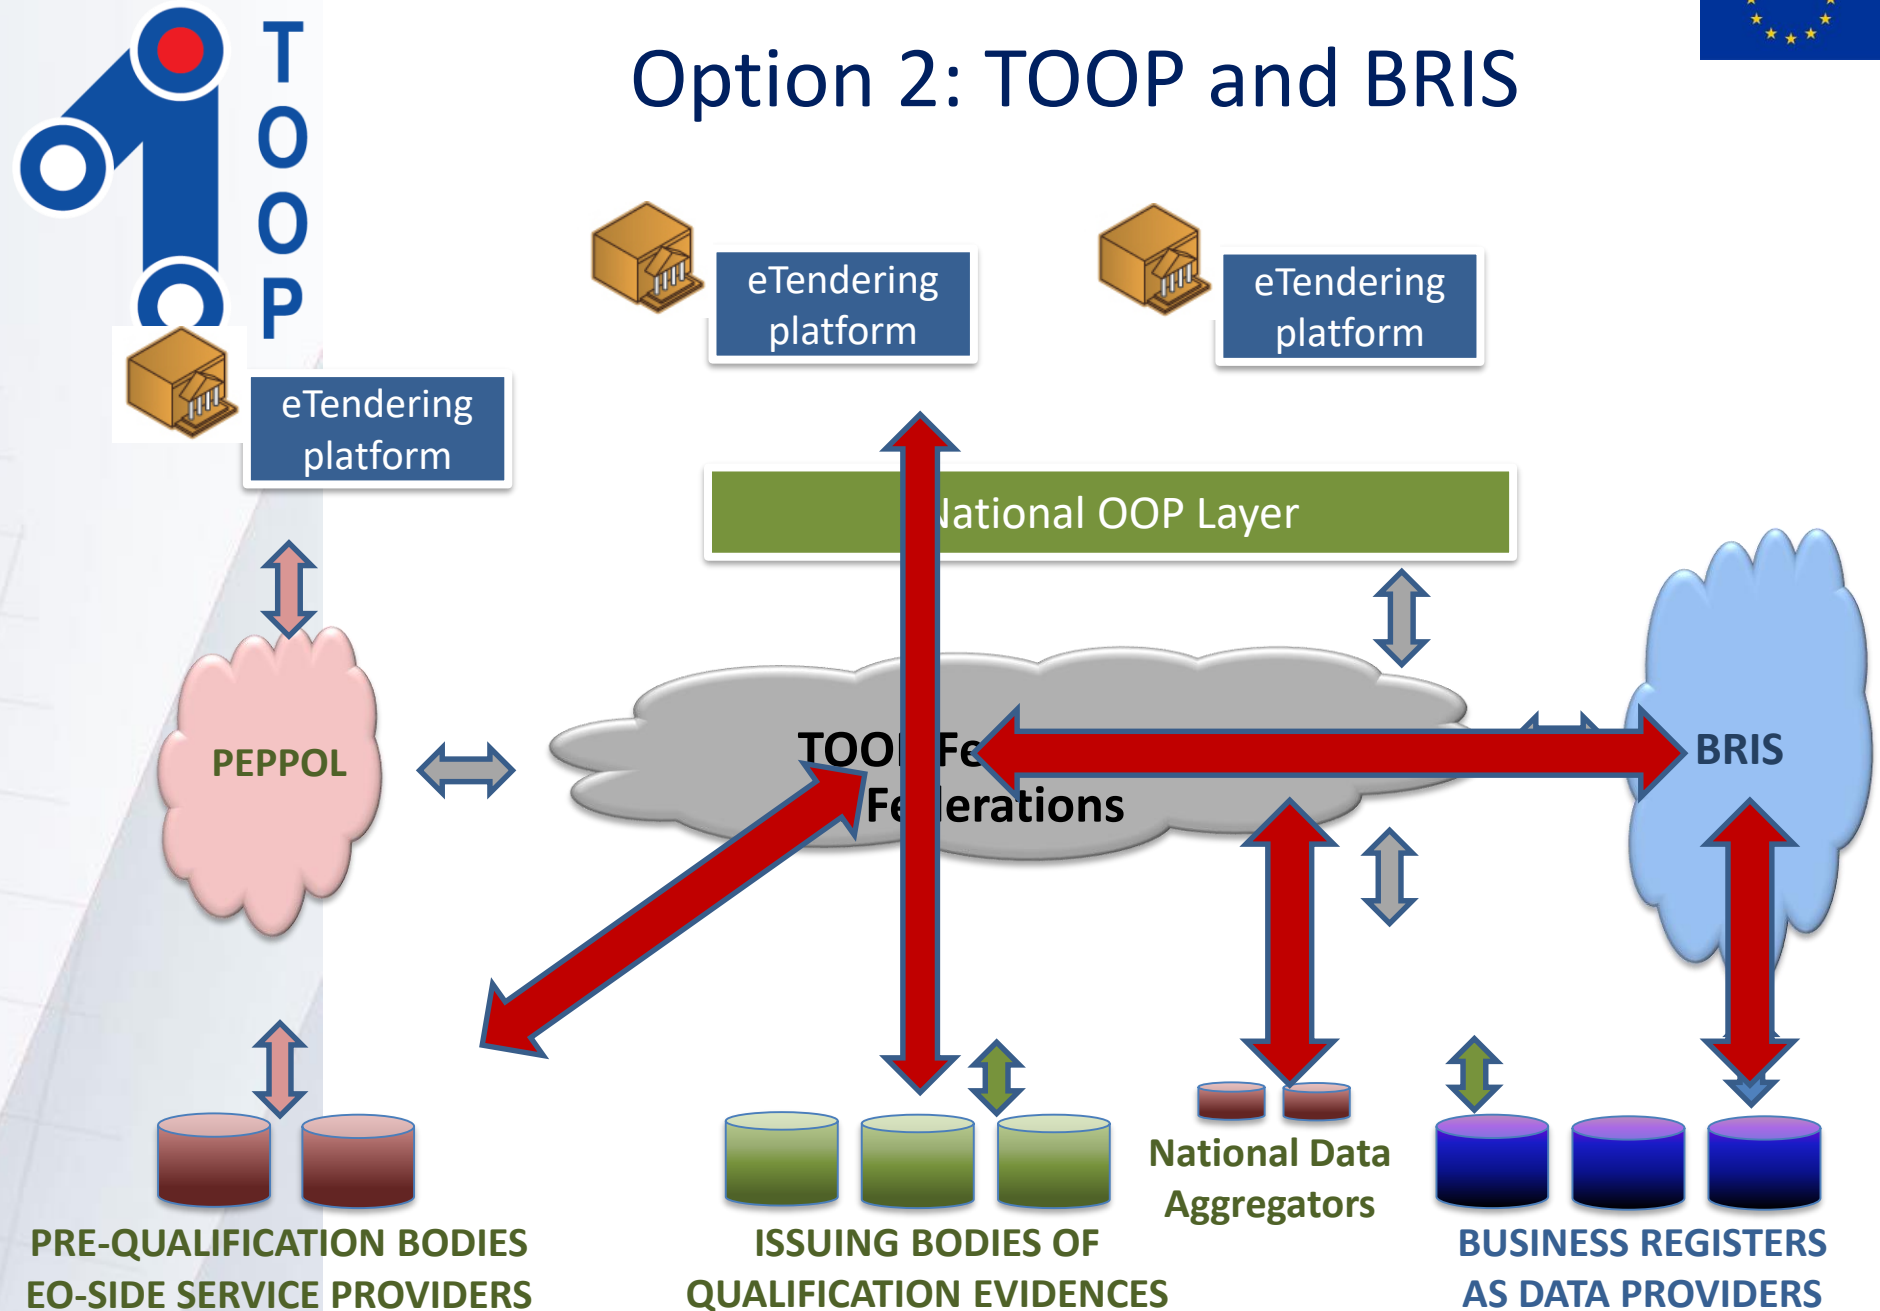

Option 1: TOOP only

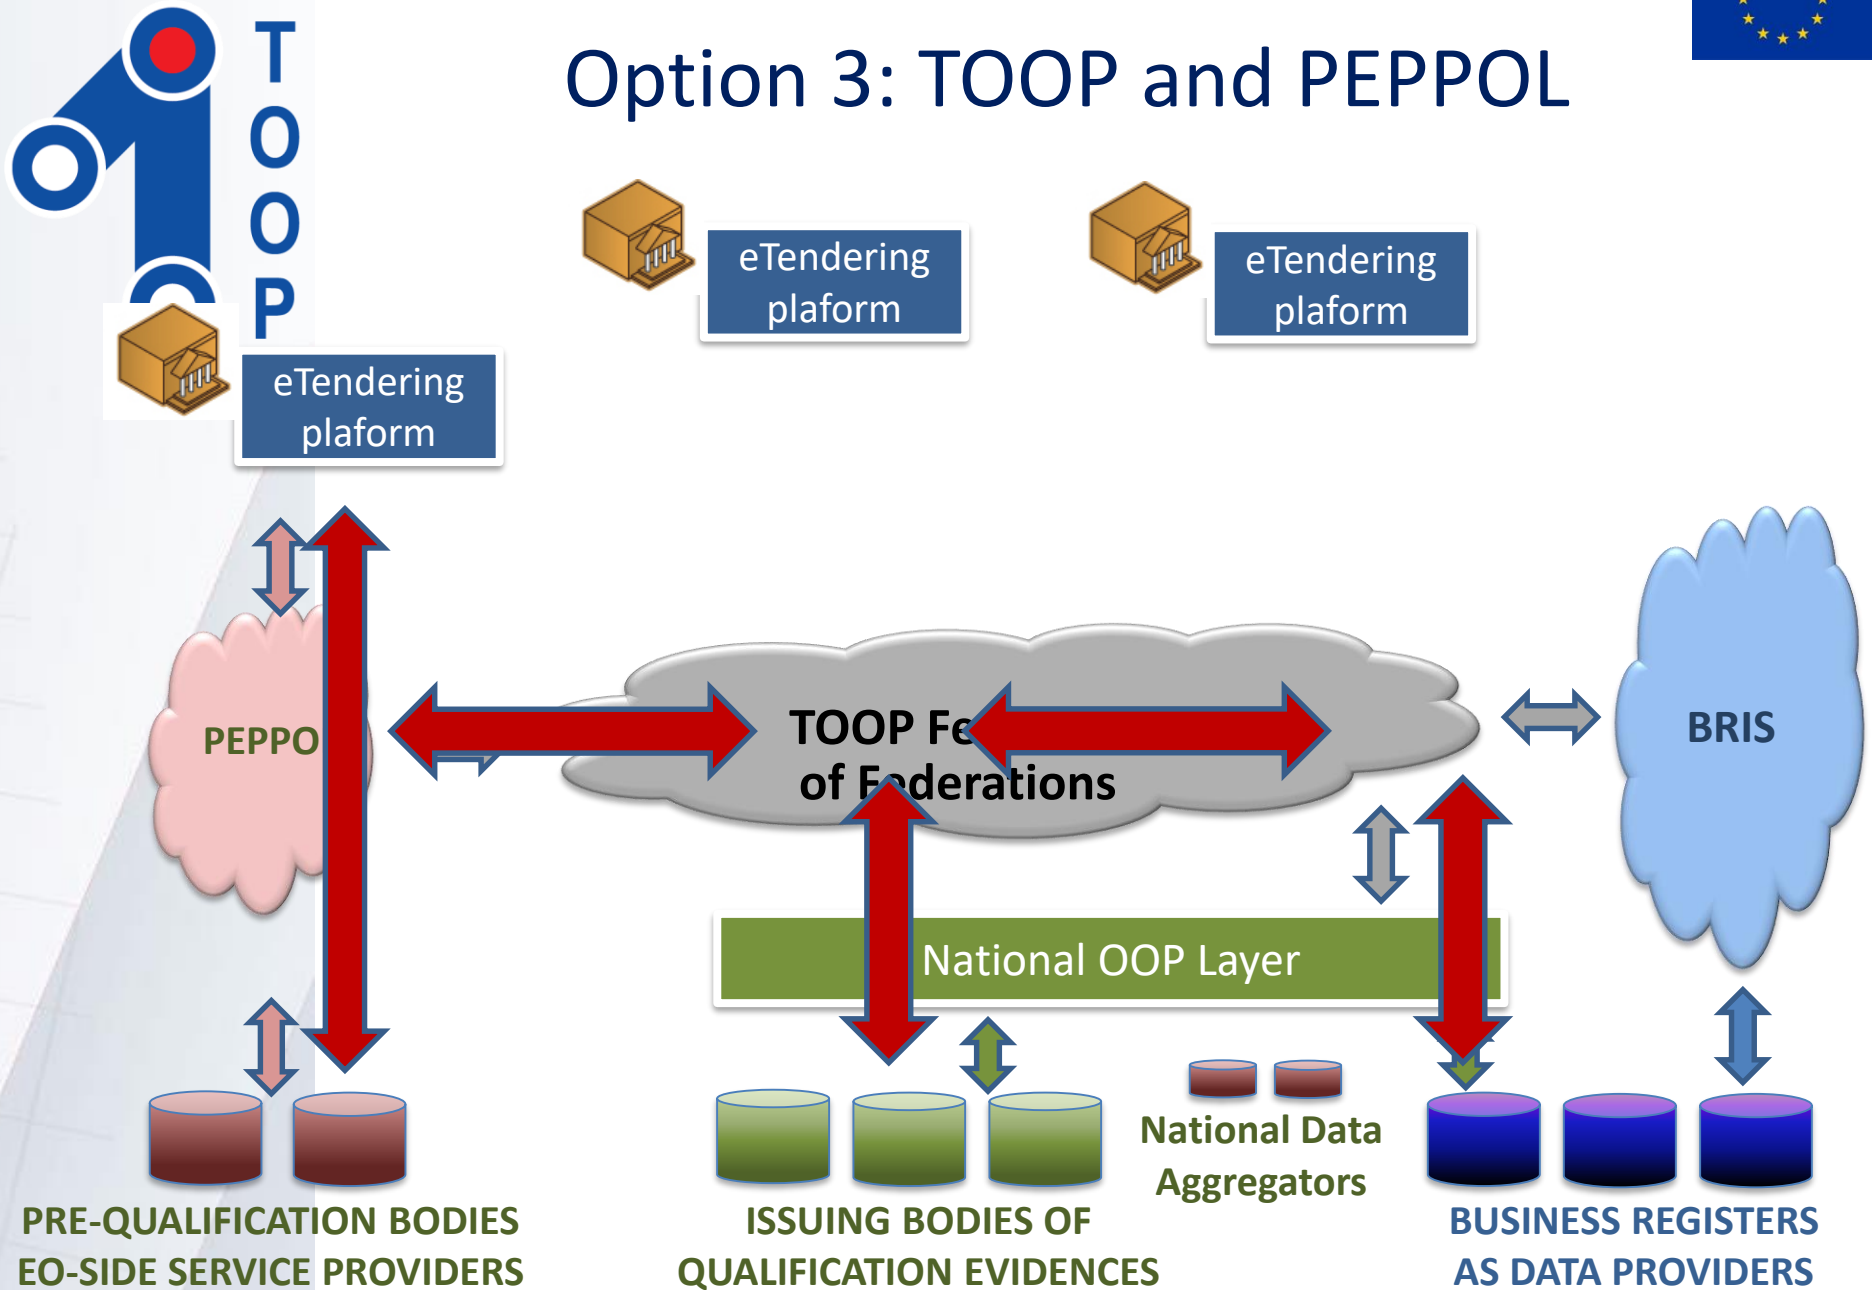

Option 2: TOOP and BRIS

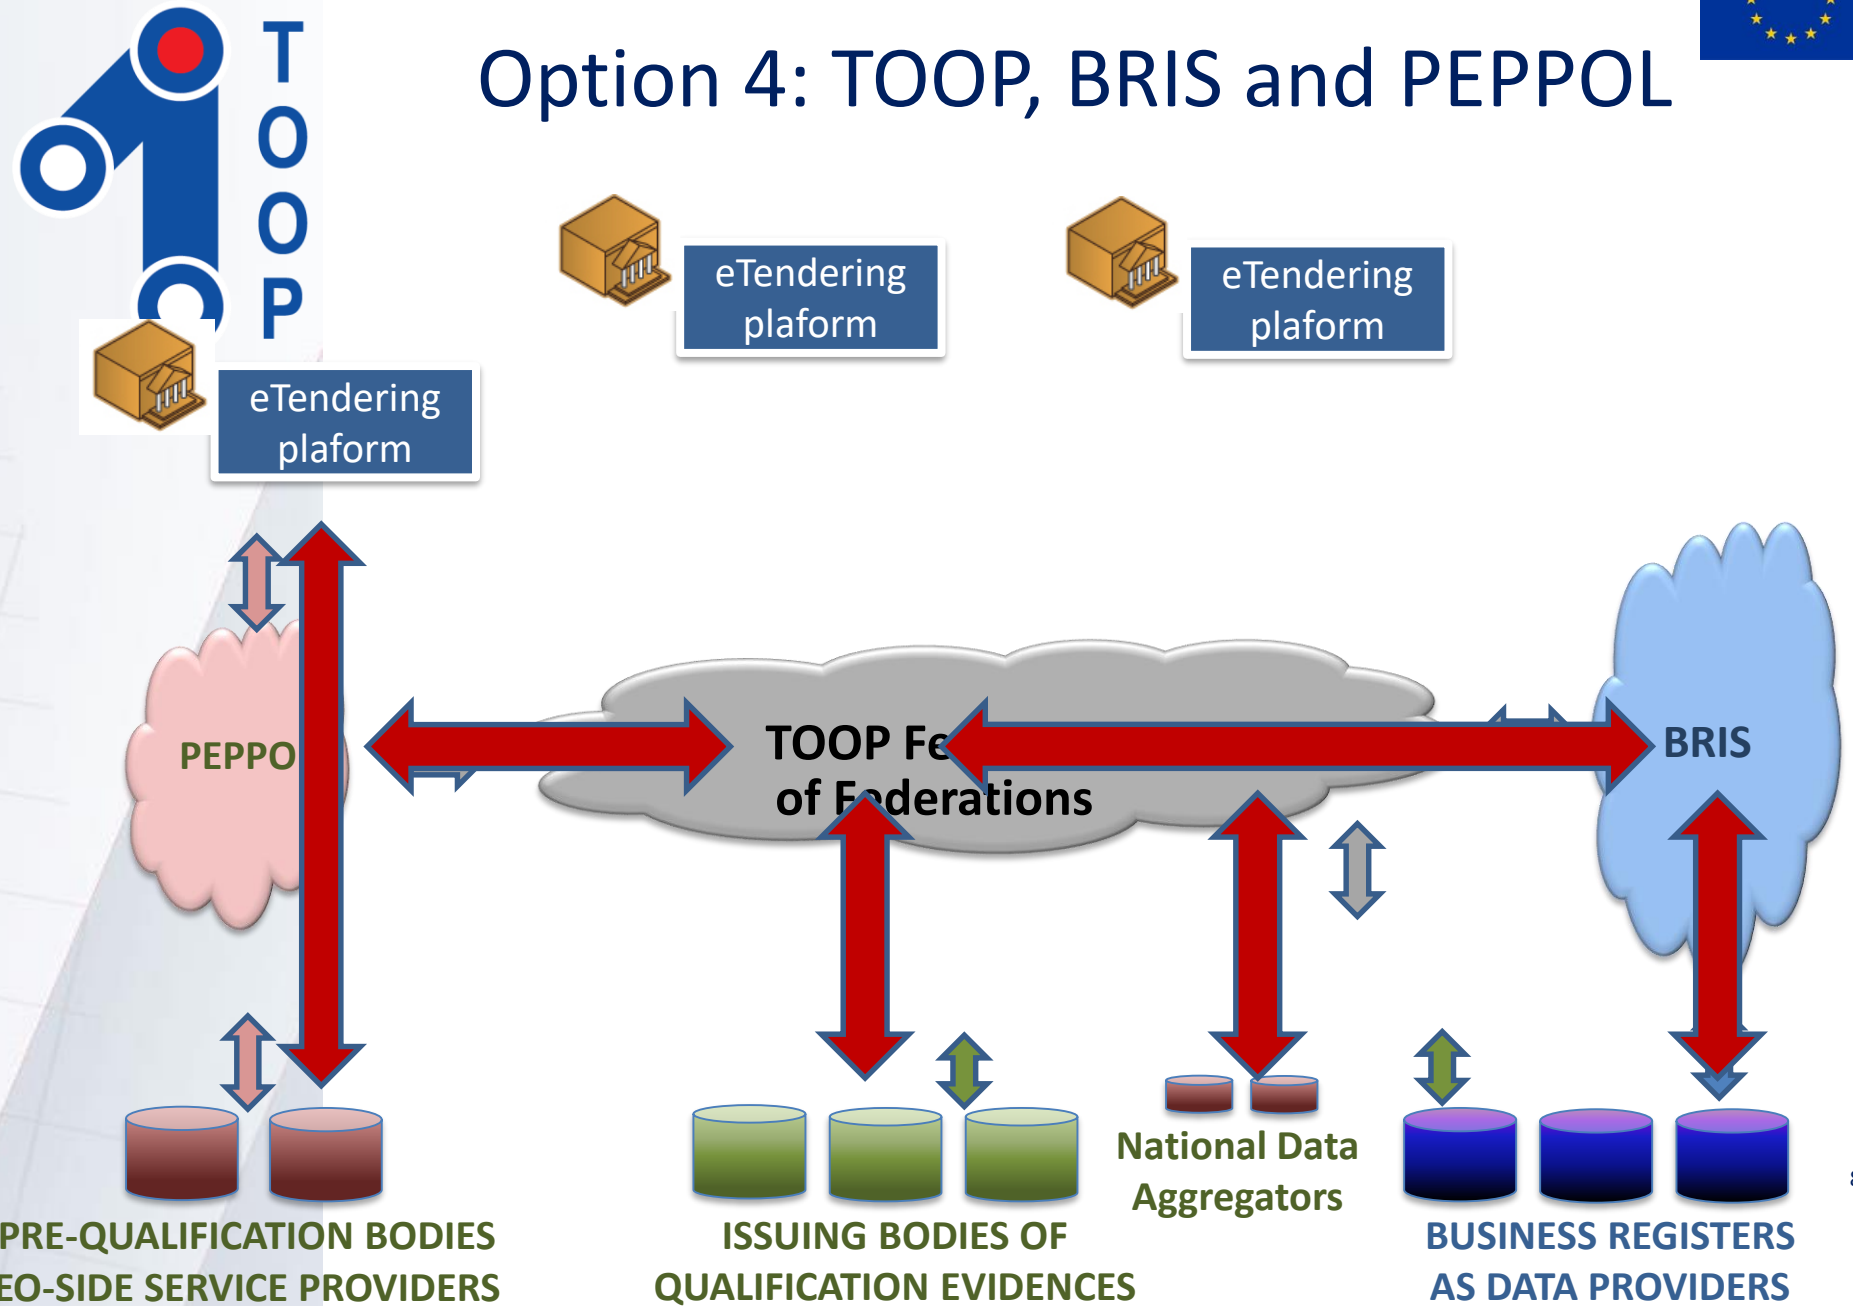

Option 3: TOOP and PEPPOL

Option 4: TOOP, BRIS and PEPPOL

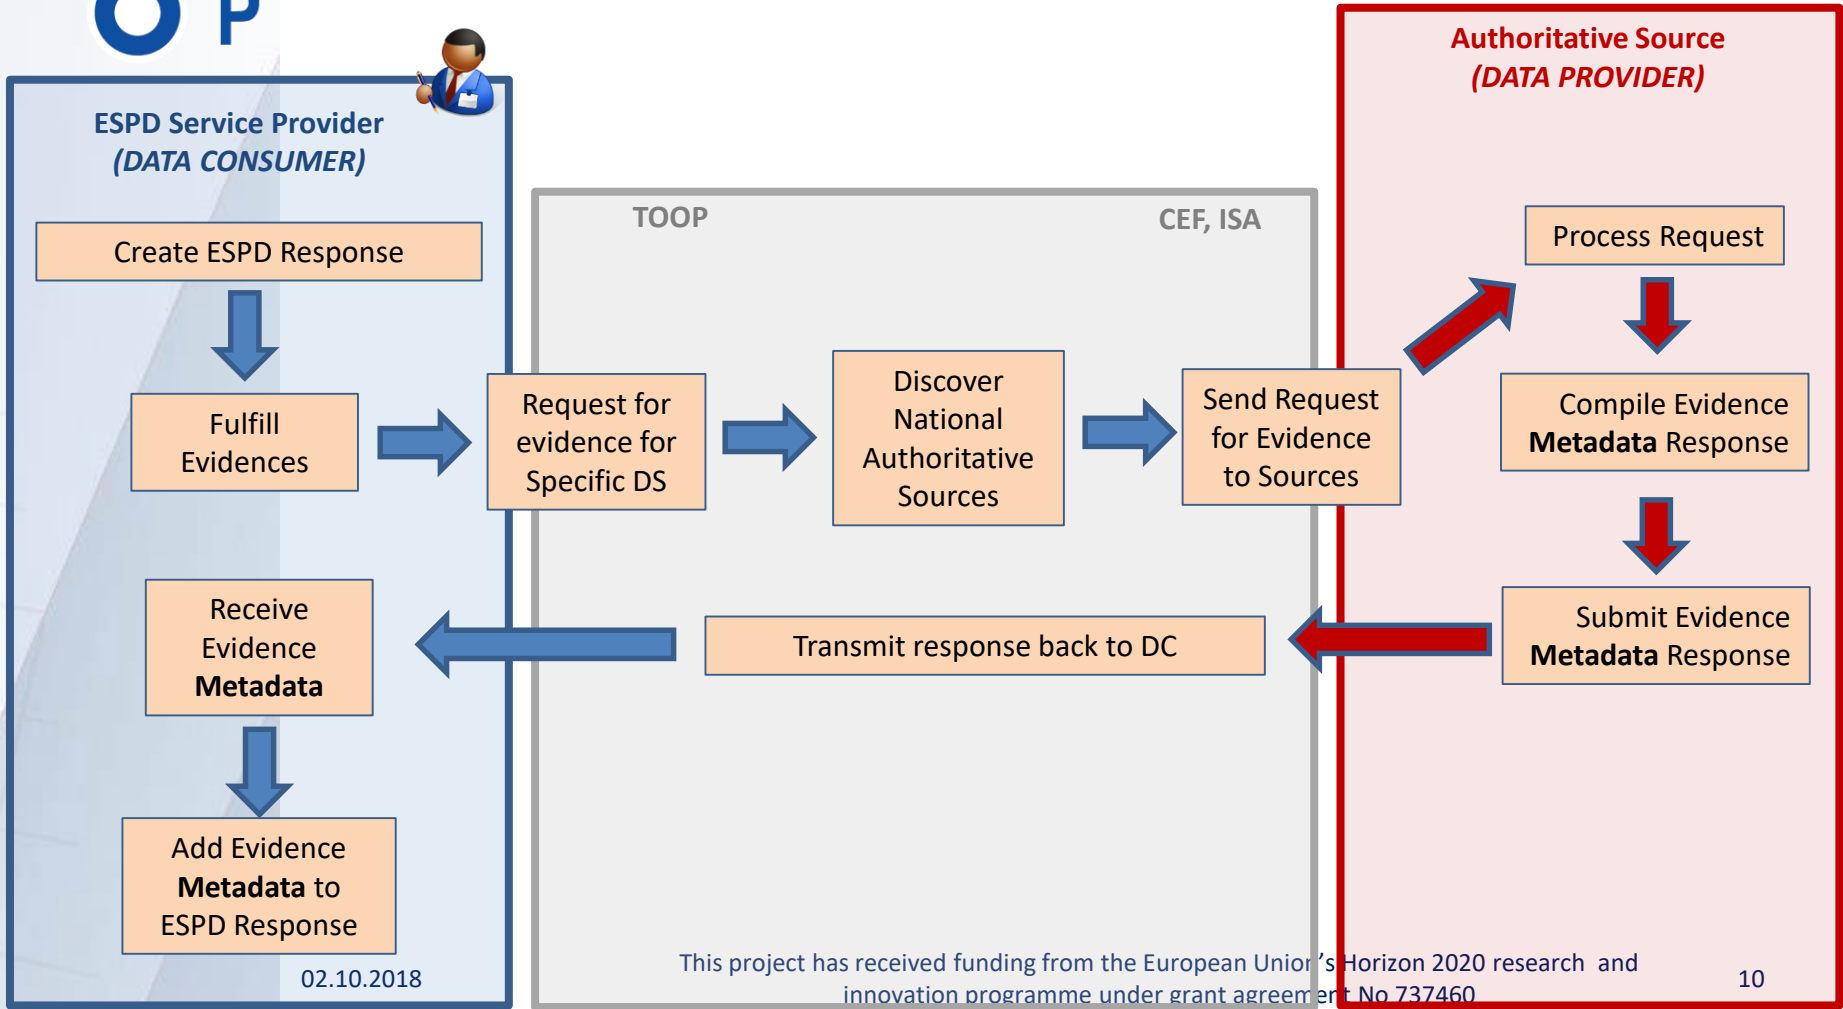

2. THE USE CASE AND THE DEMO

Main eProc Flow for Evidence Provision

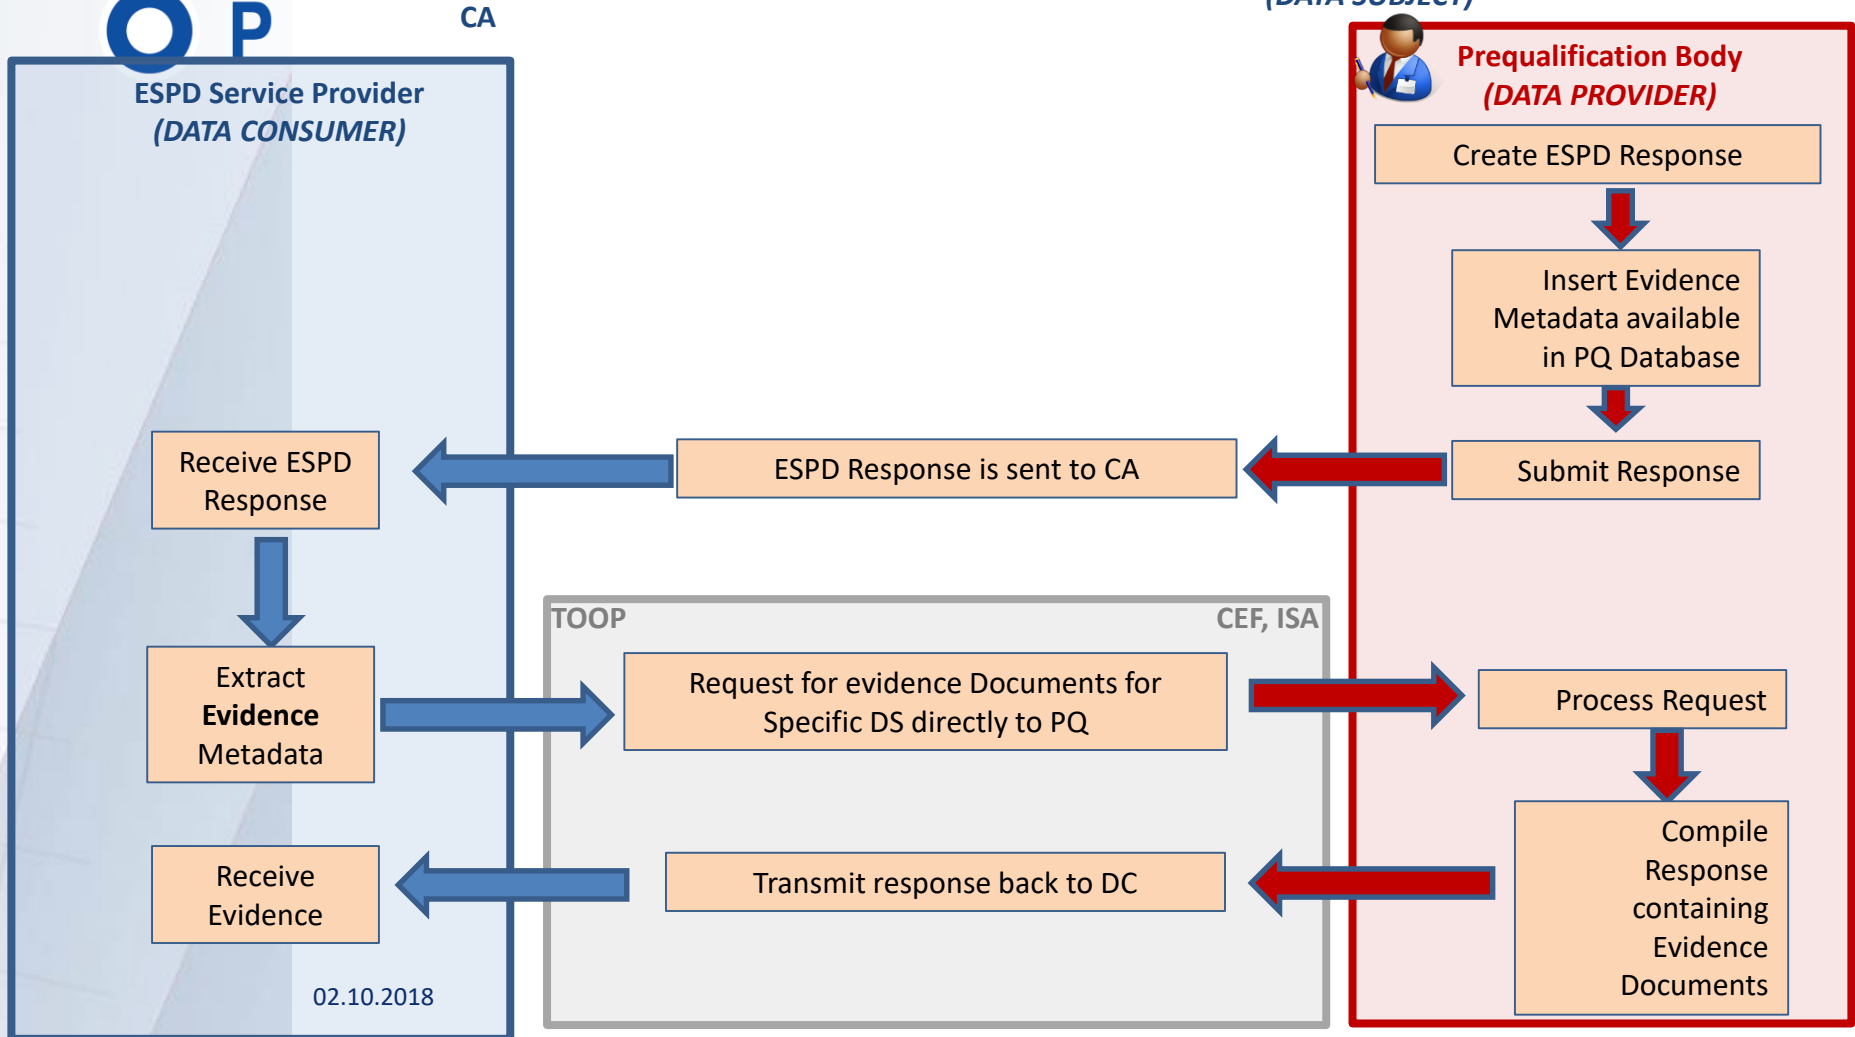

EO
(DATA SUBJECT)

02.10.2018

Using a pre-qualification body to create an ESPD

A Live demo of data exchange between GR-SE

- A Swedish company participates in a public procurement procedure in Greece.
- He is instructed to complete a European Single Procurement Document (ESPD) online.
- He does not have to enter his company data again because the Greek ESPD service is able to retrieve them directly from Bolavgsverket, the Swedish Business Register, through TOOP.

TOOP
